Ignite IT Awarded Most Promising DEVOPS Consulting Company of 2021

April 8, 2021, Leesburg, VA – Ignite IT today announced that it is named as a Most Promising DEVOPS Consulting Company for 2021 by CIOReview, a leading technology magazine. The award honors 10 companies each year that are at the forefront of providing DevOps consulting services and transforming business.

The award recognizes Ignite's extensive expertise in the public sector and an incredibly seasoned staff of IT and ex-government professionals who have proven themselves to be one of the most promising services providers in the DevSecOps space today.

The award notes that businesses in the private sector thrive following the implementation of a DevSecOps work culture while some government agencies seem to face difficulties in overcoming hurdles involving legacy systems and unique compliance requirements in their modernization journey. Ignite tackles these issues head-on by offering innovative and experience-driven consultative services for federal agencies. Ignite has developed a unique Value Factory concept that transforms all activities into the continual production of Value to its clients, while carefully tailoring the methodologies to ease the transition.

"We call this DevOps Certain. Ignite IT effectively meets the customers where they are in their DevOps journey and we expertly guide them to achieve their DevOps mission. Our success in this area has earned us this award and is a tribute to the incredible dedication and hard work of our talented staff who innovate and collaborate with our customers every day to deliver DevOps Certain. We are honored to be among the distinguished group of businesses to have been selected by CIOReview for their prestigious award." – Steven Pichney, President & CEO of Ignite IT

About Ignite IT
Ignite IT is a digital services start-up borne out of a group of architects and engineers providing solutions that transform with digital breakthroughs. We have achieved certifications in CMMI-SVC/3, ISO 20000-1:2018, ISO 27001:2013, ISO 29001:2015 and our staff holds industry recognized certifications in Cloud, DevOps, Cyber Security, RPA, ERP, and many other emerging technologies. We specialize in the areas of Cloud, Cyber, Architecture, Digital Product and Service Development, DevOps, Automation and Innovation.

Ignite IT deploys teams that are customer-obsessed, delivering a CX (Customer Experience) renaissance to the Government. We combine Commercial BX (Business of Experience) with Government delivery experts to benefit agencies to innovate and improve services and launch new digital solutions. We have built a company foundation dependent on each of our employee's success, and provide a healthy, engaging, community where learning and knowledge sharing are encouraged. We empower our employees to be bold, continually innovate and propose new ideas to improve processes and services. We engage daily on work that touches millions of people, always focusing on positive impacts and results.

We enable mission services that protect Border Agents and deploy the Army Reserve and National Guard, providing decision dominance to make America safer. We apply these digital services across to Federal Agencies that include HHS, DHS, DOS, AOUSC and Army. We aim to continually raise the bar for government agencies to expect more from their digital services. For more information, visit www.igniteitservices.com
