IGNITE IT Achieves Three ISO Standards Certifications

Leesburg, VA – Ignite IT, an innovative technology firm specializing in transforming customer vision into a new reality, today announced that it has been been awarded three ISO certifications by the International Organization for Standardization (ISO) including **ISO 20000:2018** (information technology), **ISO 27001:2013** (information security) and **ISO 9001:2015** (quality management).

ISO 20000-1:2018 focuses on providing the highest level of IT Service Management to customers, reinforcing Ignite's dedication to providing world class services to our customers.

ISO 27001:2013 is one of the most widely recognized and internationally accepted information security standards — mandating continuous controls of operations, monitoring, maintenance and continuous improvement of the information security management system. By obtaining this coveted certification Ignite emphasizes its expertise in Information Security and Assurance as well as demonstrating its strengths in Risk Management.

ISO 9001:2015 is a globally recognized quality management standard. The certification provides a model for companies of all types and sizes to use in building an effective quality management system. The standard is based on several quality management principles, including having a strong customer focus, involvement of high-level company management, an outlined process-based approach, and ongoing improvement of the aforementioned approach.

By achieving these ISO certifications, Ignite has achieved prestigious recognition for its success in establishing a company-wide culture based on robust, standardized and well-defined processes. The appraisal was performed by Maverick Quality Advisory Services (MQAS) worldwide a ISO9001,27001,20000 Certification agency.

"Ignite is honored to join the select group of companies worldwide to be awarded these prestigious ISO certifications. This accomplishment demonstrates our obsession with delivering high quality, high value services to our customers. Our corporate culture is based on our obsession with our clients, our people, and growth, which has helped us reach new levels as an organization."– Steven Pichney, CEO, Ignite IT LLC

About Ignite IT LLC

Ignite IT is a digital services start-up borne out of a group of architects and engineers providing solutions that transform with digital breakthroughs. We have achieved certifications in CMMI-SVC/3, ISO 20000-1:2018, ISO 27001:2013, ISO 9001:2015 and our staff hold industry recognized certifications in Cloud, DevOps, Cyber Security, RPA, ERP, and many other emerging technologies. We specialize in the areas of Cloud, Cyber, Enterprise Services Support, Architecture, Digital Product and Service Development, DevOps, Automation and Innovation.

COLLOBORATE   INNOVATE   SOLVE

Ignite IT deploys teams that are customer-obsessed, delivering a CX (Customer Experience) renaissance to the Government. We combine Commercial BX (Business of Experience) with Government delivery experts to benefit agencies to innovate and improve services and launch new digital solutions. We have built a company foundation dependent on each of our employee's success, and provide a healthy, engaging, community where learning and knowledge sharing are encouraged. We empower our employees to be bold, continually innovate and propose new ideas to improve processes and services. We engage daily on work that touches millions of people, always focusing on positive impacts and results.

We enable mission services that protect Border Agents, deploy the Army Reserve and National Guard, providing decision dominance to make America safer. We apply these digital services across to Federal Agencies that include HHS, DHS, AOUSC and Army. We aim to continually raise the bar for government agencies to expect more from their digital services. Please visit us at https://www.igniteitservices.com to learn more about how we help organizations achieve their goals and gain competitive advantage.

About the International Organization for Standardization (ISO)
ISO is an independent, non-governmental international organization with a membership of 165 national standards bodies. Founded on 23 February 1947, the organization promotes worldwide proprietary, industrial, and commercial standards. Through its members, it brings together experts to share knowledge and develop voluntary, consensus-based, market relevant International Standards that support innovation and provide solutions to global challenges.
